

Cover sheet — record identification

SAMPLE DOCUMENT — ENTIRELY SYNTHETIC. The City of Exampleton does not exist.

PROPERTY: 456 Specimen Ave, Exampleton, IL 62999
PARCEL (PIN): 99-00-000-001
PROGRAM: Exampleton LSLR Phase 2 (sample)
WATER SYSTEM: IL0009999 (fictional)
RECORD SPECIFICATION: ES-R v1.1 (EntryStandard LLC, 2026)
GENERATED: 2027-04-02 14:00 UTC
EVENTS IN RECORD: 9
ACCESS STATUS: non-responsive — NOT crew-ready (derived from ledger)

Chain verification

VERIFICATION: recomputed full per-property sequence @ 2027-04-02 14:00 UTC
RESULT: 0 discrepancies across 9 events
CHAIN TIP: sha256:0add470186bd812a40b738747a830f34d56efc19dc30c37e621547ba349da0d7

Chronological event record

All times UTC. Occurred is the claimed event time; Recorded is when EntryStandard received the event. Both are shown for every row, and every row carries its record source.

#	OCCURRED (UTC)	RECORDED (UTC)	EVENT	METHOD	ACTOR
1	2026-11-02 15:04 Detail: ROE packet to owner of record (absentee; mailing address differs from situs) · Record source: imported from source system — Mail vendor log (sample)	2026-11-02 18:40	Notice mailed	mail	system
2	2026-11-20 19:20 Detail: Door hanger with portal QR at property; posted-notice evidence attached · Record source: recorded live	2026-11-20 19:26	Door hanger posted	door hanger	staff:mv
3	2026-12-09 17:44 Detail: Number from utility account; no answer, no voicemail box · Record source: entered later (late-recorded)	2026-12-10 15:12	Phone call attempted	phone	staff:jr
4	2027-01-13 15:02 Detail: Text message to number on file · Record source: recorded live	2027-01-13 15:02	Text message sent	sms	system
5	2027-02-05 18:30 Detail: Field visit; tenant present, owner not on site · Record source: recorded live	2027-02-05 18:34	Field visit	field	staff:mv
6	2027-02-05 21:12 Detail: Tenant opens link from door hanger · Record source: recorded live	2027-02-05 21:12	Portal link opened	portal	portal
7	2027-02-05 21:13 Detail: Service line facts viewed · Record source: recorded live	2027-02-05 21:13	Property viewed online	portal	portal
8	2027-02-05 21:16 Detail: Disclosure version esign-2027.1 accepted (tenant) · Record source: recorded live	2027-02-05 21:16	Disclosure accepted	portal	portal
9	2027-02-05 21:19 Detail: Tenant routed to acknowledgment — tenant role cannot grant the property interest · Record source: recorded live	2027-02-05 21:19	Occupant acknowledged	portal	portal

Record-source legend

Recorded live — written by the system as the event happened (portal action, staff field capture in the workstream).

Imported from source system — a vendor log, GIS, or CRM export, kept with its source time and its import time.

Entered later — added manually after the fact from paper, email, or notes.

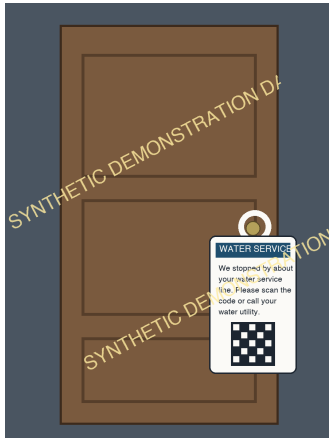

Reconstructed during review — assembled from surviving records during a file review.

Unsupported status — a claimed status with no supporting event, document, or source record.

System-derived — computed from the ledger, never asserted by a person.

A correction never edits a row: it is a new event, in sequence, with its own fingerprint.

Attempt evidence

EVENT: Door hanger posted

METHOD: door hanger — posted-notice evidence

ACTOR: staff:mv (field)

OCCURRED: 2026-11-20 19:20 UTC (claimed capture)

RECORDED: 2026-11-20 19:26 UTC (received)

RECORD SOURCE: recorded live

FILE: image/jpeg · 481,223 bytes · staged sample image · synthetic demonstration

VERIFICATION: stored — bytes match the declared fingerprint

SHA-256 FINGERPRINT (FULL)

7cf8e1e4fb448ac710239f3bd65bf57e487fcda8a95cebbf53c4399859db4fbc

Photographic evidence is preserved with its fingerprint and receipt time. EntryStandard preserves record source and integrity; it does not guarantee that every human-world fact occurred as claimed.

Record-source and verification notes

Reasonable-effort rollup (derived)

ATTEMPTS:	5
DISTINCT METHODS:	5 — mail, door hanger, phone, SMS, field
REASONABLE EFFORT:	To obtain owner consent — at least 4 attempts by at least 2 methods: met
CITATION:	40 CFR 141.84(d)(3)(i)
STATE OVERLAY:	Evaluated per program configuration; states may require more

Occupant acknowledgment — not a grant

OCCUPANT:	Riley Placeholder (tenant), portal session of 2027-02-05
ROLE ROUTING:	Tenant routed to acknowledgment flow (event 9)
ROLE ENFORCEMENT:	A tenant cannot execute the right-of-entry; a grant attempt is rejected
EXECUTED INSTRUMENT:	NONE — no signed right-of-entry exists for this property

What this file supports

CREW-READY:	NO — access not granted; property excluded from dispatch
NO-ACCESS DOCUMENTATION:	Per-property no-access file supporting the 40 CFR §141.90(e)(10) submission
ILLINOIS WAIVER STATUS:	Waiver path unresolved due to documented non-response; program counsel controls state-specific handling
OWNERSHIP CHANGE:	Renewed outreach obligations apply per program rules if ownership changes

Nothing happened at this property — and that is exactly what the file must prove. Every attempt, method, and date above is a ledger event; the non-responsive classification is derived from those events, and the chain verification on page 1 shows the record has not been altered since capture.

The record-source label

Every event on the preceding pages carries a record-source label from the legend. Not all records are equal — a record captured while the work happened is different from one reconstructed months later, and this file says which is which, row by row.

The two timestamps

Occurred is the claimed event time; Recorded is when EntryStandard received the event. Both are preserved for every row. A gap between them is not hidden — it is part of the record.

Chain verification

Each event is fingerprinted together with the fingerprint of the event before it, so the sequence cannot be quietly edited or reordered. At every export the full sequence is recomputed from scratch and compared; the result appears on the cover sheet. A correction never edits a row: it is a new event, in sequence, with its own fingerprint.

Technical record structures follow EntryStandard's ES-R v1.1 specification; the technical appendix is available on request.
